

Magnax - Program Lead - Aerospace Propulsion

Responsibilities

For the urban air e-mobility market, we are looking for the epitome of an Intrapreneur, a hands-on, technically inclined senior profile.

This is what you'll do:

Supported by your extensive experience in aerospace technology, you will be responsible for the technical development of propulsion solutions for the aviation market.

Primary duties include:

Solution development

- Create technical- and commercial proposals and support business development in the commercial process.
- Lead the solution development, testing, certification, and technical delivery efforts for customer programs.
- Identify compliance gaps, recommend design changes to meet certification requirements.
- Support in the development of the product roadmap and portfolio.

Program management

- Support with the development of manufacturing and sourcing partnerships.
- Identify (future) technical resource gaps and support HR in hiring the most suitable candidates.
- Work with the founders to further develop the business plan and priorities.

Who are we looking for?

Our ideal candidate is an engineer who is very familiar with the technical requirements of the aerospace industry, has experience in developing aerospace products and program management. He/she perfectly bridges the commercial and technical sides of the aerospace business, exhibits a can-do attitude, and approaches work with vigor and determination. However, you are not afraid of working in a fast-changing startup environment, where processes and systems are “under construction” and ambiguity is part of the decision-making process.

- M.S in Aerospace-, Mechanical-, Systems Engineering or related fields.
- Previous experience in the development and certification of aircraft (propulsion) systems.

- Experience with New Product Development processes.
- Solid product development experience and program management skills.
- Ability to communicate clearly (written and verbal) about technical subject matters with engineers, management, and regulatory agencies.
- Strong analytical skills.
- Proficient in MS Office & CRM software.
- Willing to frequently travel post-COVID-19.
- Preferably (initially) based in Belgium.
- You report directly to the Founders.

What can we offer?

You will be joining an ambitious and fast growing organization at a significant moment in our history. If you match the job description, feel ready for the challenge to build the S&M team and to accelerate the growth of Magnax Motors and you have a passion for state-of-art technology, we'd love to hear from you. In time, the right candidate can progress in his career into the role of Sales & Marketing Director to lead our global Sales & Marketing activities.

At Magnax, you can expect:

- A full-time position in an inspiring high-tech environment.
- A sneak preview to what the future brings, from electric cars to passenger drones.
- An attractive salary package with extralegal benefits.
